

RINGING BELLS FOR NURSES

2022-2023

As we start our 8 and 40 year let us remember why we are Partners of this organization. Our special children with lung disease, how are we going to help these children. Nurses to help them with their illness.

Let us work together to raise funds in our Salons, Departmental and Nationale. Last year our numbers were down in donations. Ok life has been tough for so many of us. Covid-19, inflation what about those in real need a student funding their education and we need them for fight the fight with lung illness.

I am asking each division to increase there giving from last year. Your division chairman will be coming up with ideas to raise extra funds for Nurse Scholarship let's get working for some great ideas.

Please increase information brochures to all our doctor offices, nursing schools, community schools and word of mouth. And educate in each Salon what is the Nurses Scholarship how students find applications.
